

## Requirements, Continued

---

**2. Proposed Application Complies with Permit Conditions  
FAC § 12973**

Scope: Use of state restricted materials requiring a permit that has conditions.

Determine if the application can be carried out in compliance with all conditions on the permit.

Exemptions: None

---

**3. Environmental Conditions Consistent with Permit and NOI  
3CCR § 6428(c)**

Scope: Agricultural use of state restricted materials requiring a permit.

The NOI must reflect any changes in the environment since the permit was issued. Are surrounding fields and cultural facilities consistent? Can the application be made in compliance with groundwater regulations?

Exemptions: None

---

**4. Conditions Consistent with Restricted Materials Regulations  
3CCR § 6443 – 6487.5**

Scope: Use of the following state restricted materials:

- Phenoxy herbicides, methyl bromide, 1,3-D, chloropicrin, metam-sodium, metam-potassium, dazomet, sodium tetrathiocarbonate, bentazon, aldicarb, dicamba, 2,4-D, propanil, paraquat, DEF/Folex, carbofuran, fenamiphos, azinphos-methyl, tributyltin.
- Use of pesticides registered for agricultural, outdoor industrial or institutional use containing chemicals listed in 3CCR section 6800(a).

Verify that no conditions exist on site that would prevent the application being evaluated from being performed in compliance with the regulatory requirements. Determine that the recommendation accurately documents hazards and stipulates use restrictions. For example: “Do not apply 2,4-D below the high water mark on canal sides.”

Exemptions: Exemptions vary by regulation.

---

**Restricted Materials Regulations**

Regulation specific requirements you may be able to address in a pre-application are described below.

---

*Continued on next page*

## Requirements, Continued

Restricted Material	3CCR Section	Guidance
Phenoxy herbicides (timber)	6443	For aerial applications of phenoxy herbicides related to timber production: <ul style="list-style-type: none"> <li>Was the permit posted?</li> <li>Did the permittee mail copies of the permit to persons owning property within 300 feet of the treatment area?</li> </ul> Has there been a request for review of the permit?
Methyl bromide	6447.1, 6447.2	For field fumigations: <ul style="list-style-type: none"> <li>Were property operators within 300 feet of the outer buffer zone notified of the fumigation?</li> </ul> Will the inner buffer zone extend into another property? Does the outer buffer zone extend onto a property that contains a sensitive site?
1,3-D, Chloropicrin, Metam-sodium metam-potassium	6448.1 6449.1 6450.1	For field fumigations in non-attainment areas during May through October: When soil moisture is not addressed in labeling, does the site meet regulatory soil moisture requirements?
Chloropicrin	6453	For nursery or commodity fumigations of potting soil, agricultural commodities or equipment: Will the fumigation be performed in a properly sealed chamber or under a gas confining tarp?
Dazomet Sodium tetrathio-carbonate	6450.2 6451.1	Does the method of application identified in the permit or notice of intent match a specifically identified method described in the dazomet or sodium tetrathiocarbonate labeling?
Bentazon	6457	Bentazon use is prohibited in Del Norte and Humboldt counties. Bentazon use is prohibited in rice production.
Aldicarb	6458	Aldicarb use on cotton, potatoes, sugar beets, dried beans, citrus or field grown ornamentals is prohibited from September 1 to March 1. Determine that the rate noticed is in compliance with the crop and crop stage in the referenced regulatory table.
Propanil	6462	Aerial applications prohibited within four miles of prune fields. Limited exemption in Butte county, see 3CCR § 6452(c). Ground applications prohibited within one mile of prune fields. Limited exemption, see 3CCR § 6452(d).

## Requirements, Continued

<b>Restricted Material</b>	<b>3CCR Section</b>	<b>Guidance</b>
Phenoxy and certain herbicides	6464	The subject regulation restricts the use of Dicamba, certain 2,4-D formulations and propanil on described areas in Sacramento, Madera, Fresno, Kings, Tulare, Kern and San Joaquin counties.
Cotton harvest aids - DEF/Folex, Paraquat	6470	Paraquat applications prohibited within one-eighth mile of schools or residential areas. DEF or Folex applications prohibited within one-half mile of residential areas or any schools in session or due to be in session within 24 hours of application. DEF or Folex applications prohibited within one-eighth mile of schools.
Carbofuran	6474	Applications to alfalfa are prohibited within one mile of feeding areas of waterfowl or geese, widgeon or coot nesting areas.
Fenamiphos	6476	Applications prohibited to residential or institutional turf areas and to recreational turf areas (golf courses excepted). Determine that irrigation water will not run off the treated area.
Tributyltin	6488/89	Use is restricted to aluminum vessel hulls, vessel hulls that are at least 82 feet long and outboard motors and lower drive units.
Chemicals listed in 3CCR section 6800(a)	6487.1 through 6487.5	When registered for agricultural, outdoor industrial or institutional use: Determine that the site is configured in such a way that the application can be made in compliance with runoff and leaching restrictions in artificial recharge basins, canals and ditches, and in leaching and runoff groundwater protection areas.
